VIKING AXE SERIES TANK BAG

Instructions

The base of the bag is equipped with heavy duty magnets. Center the bag on top of the fuel tank such that the magnets inside the side flaps and the rear flap securely attach to the fuel tank. See following figures for reference.

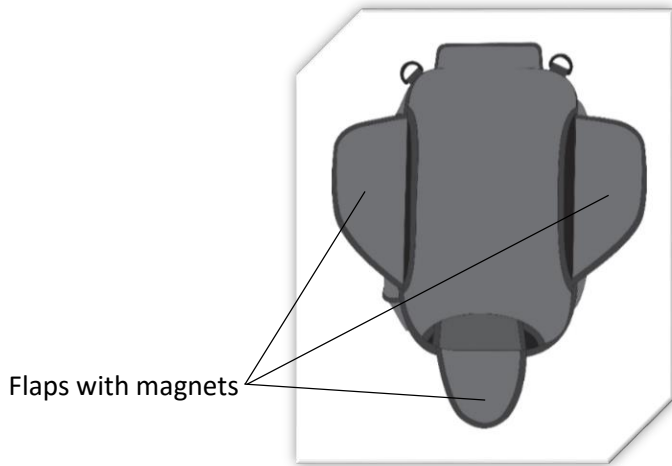

Fig A

Fig B

⚠ Note

The side flaps can be stowed into the folding panel at the back of the bag as shown in FIG C. With flaps tucked in, the provided 2 backpack straps can be connected to convert the tail bag into a backpack for easy carriage when off the bike

Warnings

- ✓ Improper Installation can result in accidents and injury. Always ensure all the straps are tight and the bag is in place.
- ✓ During mounting, no part of the luggage should obstruct any moving part of the motorcycle.
- ✓ Sporadically check the luggage to ensure everything is in place and straps (if any) are tucked away and do not hang in excess
- ✓ It is user's responsibility to install the bags correctly according to the instructions. Viking bags is not responsible for any damage caused due to improper instructions.
